

AHMED ABD EL MONIEM

PRINCIPAL SOFTWARE ENGINEER • SOLUTION ARCHITECT

Location: Riyadh, Saudi Arabia Phone: +966 50 310 0847 Email: ahmedmoneim094@gmail.com

Principal Software Engineer and Senior Full Stack Developer with over 7 years of enterprise-grade experience architecting and delivering high-performance web applications and distributed business platforms. Core expertise in **.NET Core, Angular, Low-Code (OutSystems), and Microservices Architecture**. Accomplished track record leading technical design, Domain-Driven Design (DDD), secure identity integrations (OAuth2/OIDC), and full-lifecycle delivery across government and enterprise sectors.

CORE TECHNICAL EXPERTISE

Architecture	System Design, Clean Architecture, Domain-Driven Design (DDD), Microservices, SOLID, REST APIs, gRPC, WCF
Backend	C#, ASP.NET Core, .NET 9/10, Multithreading, Asynchronous Programming, Python, Rust
Frontend	Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery
Security & Identity	IdentityServer, OpenID Connect (OIDC), OAuth 2.0, PKCE, JWT, Web Security Protocols
Database & ORM	SQL Server, Oracle, Entity Framework Core, Dapper, ADO.NET, Database Optimization
Low-Code & Practices	OutSystems Enterprise Platforms, Unit Testing, Code Reviews, CI/CD, Technical Documentation, Mentoring

PROFESSIONAL EXPERIENCE

Principal Software Engineer • SNS — Riyadh, Saudi Arabia May 2026 – Present

- Lead end-to-end technical analysis, solution design, and architectural governance for scalable enterprise software.
- Architect maintainable systems utilizing DDD, clean design principles, system flowcharts, and high-level architectural blueprints.
- Conduct system performance evaluations, identifying bottlenecks and implementing high-impact procedural and technical improvements.
- Enforce software quality standards via code reviews, root-cause troubleshooting, and mentoring junior/mid-level engineers.

Senior Full Stack Developer • ALMOAMMAR — Riyadh, Saudi Arabia March 2023 – May 2026

- Engineered robust enterprise web applications using .NET Core APIs, modern Angular frontends, and SQL Server.
- Designed identity and security layers implementing OAuth 2.0, OpenID Connect, and granular RBAC authorization models.
- Diagnosed and resolved critical production issues using structured root-cause analysis and performance tuning.
- Collaborated with technical leads and enterprise stakeholders to drive continuous feature delivery and integration workflows.

Senior OutSystems Developer • Envnt — Sheraton, Egypt July 2021 – January 2023

- Architected and deployed custom low-code solutions from scratch on the OutSystems Enterprise Platform.
- Designed streamlined application workflows, user experience components, and backend database structures.
- Maintained, scaled, and configured core business applications while providing advanced L3 technical support.

Full Stack Developer • National Technology — Nasr City, Egypt April 2020 – July 2021

- Built scalable backend services and UI components using .NET Core, Entity Framework, ADO.NET, and Angular 8.
- Integrated enterprise healthcare workflows and optimized query performance across complex database structures.

Full Stack Developer • ArmyTech — Remote, Egypt January 2017 – March 2018

- Delivered full-stack components in an Agile environment, contributing to continuous iterative deployments.

SELECTED KEY PROJECTS

Enterprise Laboratory Information System (LDM)

Healthcare • HL7 • Interoperability

A multi-specialty Laboratory Information System streamlining sample tracking, order requisition, and results delivery with seamless HIS integration and HL7 interoperability.

Enterprise Single Sign-On & Identity Platform

OAuth 2.0 • OIDC • PKCE

Centralized authentication and security infrastructure managing token lifecycles, refresh flows, PKCE, claims, and RBAC across multi-tenant enterprise applications.

Ideas & Innovation Management Platform

.NET Core • Angular • Workflow

Enterprise submission and workflow engine providing multi-stage review pipelines, attachment handling, and role-based validation.

Enterprise Distributed Services Engine

Microservices • gRPC • DDD

High-throughput distributed service layer utilizing gRPC, Domain-Driven Design, and decoupled microservices to maximize maintainability.

EDUCATION & CERTIFICATIONS

Information Technology Institute (ITI)

Graduate — .NET Full Stack Development Track (2020)

Minia University, Egypt

B.S. in Computer Science (2013 – 2018)

ENGINEERING STRENGTHS

Solution & System Design

Enterprise Microservices

API & Integration Architecture

OAuth2 & Identity Management

Root-Cause Analysis

Technical Leadership & Mentoring

Agile Delivery
